Engineer for technical inspection of vehicles

Job

- Technical Inspection of all types of motor vehicles in accordance with § 29 StVZO (German Road Traffic Licensing Regulations) at the technical service center and in workshops.
- Conducting modification inspections including the confirmation of the modification acceptance according to §19.3 StVZO
- Various other tasks in the field of a technical expert, such as driving license examinations, vehicle damage appraisals, vintage car valuations
- Maintaining the existing customer database and acquiring new customers

Qualifications

- Completed degree in mechanical engineering, automotive engineering, electrical engineering or a comparable degree course
- Ideally, initial experience in the automotive sector, e.g. through previous vocational training in the field
- Passion for vehicles and technology
- Careful approach to work, sense of responsibility and strong communication skills for dealing with customers
- Good knowledge of German, written and spoken (Level B2)

Further information

The qualification as an officially accredited expert or test engineer takes place on a part-time basis in an employment relationship. We pay a fixed salary from the start and at the same time intensive theoretical and practical training will prepare you for the examination. TÜV SÜD covers the entire cost of the qualification. Likewise, part of the costs for the HGV driving license will be reimbursed. We offer a secure position with an engineer's salary in line with the market and the possibility of performance bonuses in accordance with our collective wage agreement with comprehensive social benefits, a company pension scheme and an attractive group performance bonus. The working hours are 38.50 hours per week, overtime is remunerated with a supplement or can be taken as additional free time. After completing your training, you will benefit from the TÜV SÜD Group's comprehensive career planning and development program.

More information on joining the company and on further qualification as a motor vehicle expert is available at: www.tuvsud.com/mobilitaetsexperten.
